

[illegible]

The schematic diagram illustrates the ATtiny2313-based wireless module. The circuit is powered by a 3V supply and a 1.5V AAA battery. The ATtiny2313 (IC2) is connected to a wireless module (Wireless module2) via a 10k resistor (R3) and a 10k resistor (R4). The wireless module is connected to an antenna (Ant2) and a 100nF capacitor (C6). The ATtiny2313 is also connected to a switch (S4).

ATtiny2313 Pinout:

Pin	Function
1	(RESET) PA2
2	(RXD) PD0
3	(TXD) PD1
4	(XTAL2) PA1
5	(XTAL1) PA0
6	(INT0) PD2
7	(INT1) PD3
8	(T0) PD4
9	(T1) PD5
10	GND
11	PD6 (ICPI)
12	PB0 (AIN0)
13	PB1 (AIN1)
14	PB2 (OC0A)
15	PB3 (OC1A)
16	PB4 (OC1B)
17	PB5 (MOSI/DI)
18	PB6 (MISO/DO)
19	PB7 (SCK)
20	VCC

Wireless module2 Pinout:

Pin	Function
1	SDO
2	nIRQ
3	FSK/DATA/nFFS
4	DLCK/CFIL/FFIT
5	CLK
6	nRES
7	GND
14	ANT
15	VDD
16	GND
17	nINT/nDI
18	SDI
19	SCK
20	nSEL
